## Starter-Kits for *Ron Vaughn* FlexMount™ Hardware for Multiple Percussion set-ups

Use these FlexMount component parts starter-kits to begin your 'Erector-Set' style personal performance set-ups

This hardware is all part of Ron's popular FlexMount system for building custom, personal set-ups for the above listed FlexMounts for Ron Vaughn Signature blocks.

These starter kits are just that: they'll get you started, and you can add other components as you gain experience creating your personal set-ups.

Individual FlexMount components begin in this price list on line #157 below.

90	RV-Flex.1.kit	This simple 'kit' includes one FM-Tbase, one FM-12Bar, and one FM-Key.	\$435.25
91		You can mount several Signature wood blocks in a single row, with good options for spacing between blocks, and excellent overall height adjustment.	
92		You will need to purchase the specific individual Signature block FlexMounts you will want from the list above, beginning on line #64 of this price list.	
93		You will also need one good cymbal stand base that will accept a 3/4" down-tube to use your new FlexMount hardware.	
94		<i>Ron Vaughn</i> Signature Wood Blocks are sold separately, beginning on line 44 of this price list.	
95	RV-Flex.2.kit	This 'kit' includes one FM-Tbase, one FM-12Bar, one FM-10Bar, one FM-6Bar, two FM-XR3 assembly rods/connectors, and one FM-Key.	\$870.50

96  
97  
98  
99  
100

You can mount several Signature wood blocks in a single row, and additional Signature blocks in adjacent, connecting rows.  
You will need to purchase the specific individual Signature block FlexMounts you will want from the list above, beginning on line #64 of this price list.  
You will also need one good cymbal stand base that will accept a 3/4" down-tube to use your new hardware.  
*Ron Vaughn* Signature Wood Blocks are sold separatly, beginning on line 44 of this price list.

101
