W-8	Genuine African Mahogany, 3 7/8" x 5 5/8" x 13 1/4"	B 4	LBM-3R

Strobe Tuned Blocks: Our blocks are strobe tuned. As fixed-pitch instruments, these pitches can and will often change to a few cents sharp or flat from their factory tuning due to temperature, humidity, and atmospheric pressure changes.

Mallets:

Multiple Percussion Mallets, MPM-1.75R: for fast-moving multiple percussion pieces, if only one mallet can be used for an entire piece, please use our MPM-1.75R mallets. The MPM-1.75 mallets will produce a good sound throughout the collection, from piccolo to the largest W-8 block.

Mallet Selection: for best pitch results, instrument voice and overall sound, consider playing these blocks with the mallets that were designed for them individually.

Mounting: whenever possible, please use the designed, intended FlexMount block mount designed for each of these Tuned Signature Wood Blocks.
